LANCELEAF TICKSEED

Coreopsis lanceolata

A wonderful plant for colonizing poor soils, this native produces bright yellow daisy-like flowers on long stems. Great for pollinators and beneficial insects!

Benefits for Wildlife

- Attracts a wide variety of pollinators
- Birds enjoy the seeds in the fall

Host to 2 caterpillar species:
Wavy-Lined Emerald; Common Tan Wave

Benefits for People

- Beautiful bright yellow in flower arrangements
- Deadhead spent flowers to curb self-seeding

Growing Information

Sunlight	Full sun
Soil Type	Poor, sandy, or rocky soils with good drainage
Height	1-2'
Width	12-18"
Flowering calendar	Late-May to July

Natural Habitat

- Fields and roadsides

Climate Resiliency Species
